

## OBJECTIVE OF MY SOCIOLOGY EXAMINATIONS

- To minimize memorization and to provide students with opportunities to transform information into a resource. This is achieved by empowering students to use the contents of the textbook and the powerpoint lecture presentations to demonstrate understanding of and insight into concepts and paradigm by:
  - 1) Interacting with the questions as a way of gaining insight into how sociologists think about the world
  - 2) Engaging with context and content of the dimensions of the social world represented in the questions
  - 3) Analyzing the concepts and paradigms for comprehension to correctly explain context and content of the questions
  - 4) Applying contextual understanding/comprehension of concepts and paradigms to answer the questions.
